Flick The Goal! belongs to the puzzle game line but uses a football theme. The creative combination makes it interesting and quickly becomes a global phenomenon. The gameplay isn't really that hard to get used to. All you have to do is use some control and calculation techniques based on real physics to be able to master the game. However, the relentless creativity of the game creation team makes it much more diverse and unpredictable. The combination of puzzles and football themes creates a game that creates the extreme excitement of Flick Goal! use goals and players must aim correctly to make shots correctly. You have to aim accurately and make powerful and decisive shots. The first challenge is usually not too difficult with the aim of helping players get used to how to control everything. The game will have many different levels, the higher the level, the harder the challenge. In fact, the level will contain several stages with similar challenges to test the player's true level. They will also be updated regularly, the settings will be complicated and there is almost no solution. You only have one way is to try all the possible changes and rely on luck time only. The character system is cute, not bound by patterns though, Flick Goal! is a game built on the theme of football but not locked by the pattern of football. Because, in reality this game is completely independent of the sport mentioned above. Therefore, players can freely adjust the shape of the character to the most appropriate. Moreover, the challenge is not only tied to the football field. You can also play in different places such as parking lots, beaches, even snowy mountains,... In general, creativity in this game is unlimited. In addition, the ball can also be adjusted so you don't get bored during playing too long. For example, you might think you play a football game, but if you turn a ball into a basketball and basketball outfit, it will be completely different. but the dynamics and dynamics remain the same. Game modifications don't really affect the feeling of your game. The operating mechanism is obviously simple but it takes a lot of Flick Goal calculations! is a game operated in the style of a shooting game with dominant puzzle elements. You'll play a character who trains to kick a penalty at a certain distance. However, the system will present different obstacles so you can't shoot at the goal easily. You can imagine it is the players who are trying to stop you from scoring. One of the differences is that it's not moving. All you have to do is aim at the ball landing point accurately and swipe the screen. The special thing is that you have to try to align the strength and direction so that the player can perform perfectly. Sometimes, all of them Blocking the goal, you have to calculate according to the laws of light reflection to calculate the angle of bounce and score. You are now ready to download Flick Goal! Free.
